<em><span class="\_c1 bigger \_c1">Le format CMI</span></em> <div>

<p>Format par défaut sur CyberMUT, le CMI est destiné à notre logiciel CyberGestion.</p>

<p>Sélectionnez le type de téléchargement que vous souhaitez faire, puis l'ensemble des comptes dont vous désirez obtenir les mouvements.</p>

<p>Le fichier récupéré pourra alors être directement traité par CyberGestion.</p>

<p><em>Remarque :</em><br />

le logiciel Tous Comptes Faits (Innomatix) pour Macintosh peut également traiter les fichiers au format CMI à partir de sa version 3.5.4b7.</p>

</div><em><span class="\_c1 bigger \_c1">Le format OFX</span></em> <div>

<p>Lui aussi destiné aux logiciels de gestion de comptes tels que Microsoft Money ou Quicken d'Intuit, ce format présente deux atouts par rapport au QIF.</p>

<p>D'une part il permet de gérer les doublons lors de l'importation des données dans le logiciel, et d'autre part il vous permet de télécharger plusieurs comptes en une seule fois.</p>

<p>Vous devez choisir la version du logiciel qui traitera le fichier téléchargé, puis le(s) compte(s) dont vous souhaitez obtenir les mouvements.</p>

</div><em><span class="\_c1 bigger \_c1">Le format QIF</span></em> <div>

<p>Ce format est destiné aux logiciels de gestion de comptes tels que Microsoft Money, Quicken d'Intuit ou Tous Comptes Faits (Innomatix) pour les utilisateurs de Macintosh.</p>

<p>Vous devez choisir la version du logiciel qui traitera le fichier téléchargé, puis le compte dont vous souhaitez obtenir les mouvements.</p>

<p>Si vous avez plusieurs comptes, vous devrez faire autant de téléchargements que vous avez de comptes et importer chacun des fichiers dans votre logiciel.</p>

<p>Vous avez toujours la possibilité de personnaliser le format QIF utilisé ; cela peut vous être utile si vous utilisez une version étrangère de Money ou Quicken.</p>

<p><em>Remarque :</em><br />

si la case [Libellé comme tiers] est cochée, le libellé du mouvement ira dans la zone "Tiers" de votre logiciel. Dans le cas contraire, il ira dans la zone "Monto".</p>

</div><em><span class="\_c1 bigger \_c1">Le format CSV</span></em> <div>

<p>Si vous gèrerez vos comptes dans un tableur tel qu'Excel ou à l'aide d'une base de données telle qu'Access, ce format est fait pour vous.</p>

<p>Les données relatives aux mouvements d'un de vos comptes sont en effet présentées sous forme d'un fichier texte. Chaque mouvement occupe une ligne et ses informations sont séparées les unes des autres par un caractère spécial. Par défaut, il s'agit d'un point-virgule.</p>

<p>Comme pour le format QIF, vous ne pouvez sélectionner qu'un seul compte par téléchargement.</p>

<p><em>Remarque :</em><br />

quel que soit le format sélectionné, vous ne pouvez télécharger que les mouvements consultables sur le site bancaire. Il n'est pas possible d'obtenir des données plus anciennes. La zone de saisie de la date vous permet de restreindre la quantité de données téléchargées, par exemple en vous limitant aux deux dernières semaines.</p>
